### UniFLEX™ SOFTWARE LICENSING INSTRUCTIONS

Before taking delivery of UniFLEX software, the customer is required to sign the attached "Binary Software License Agreement". After reading it carefully, if you agree to all points covered, fill in all the requested information including the information about the CPU for which the program is being licensed. PLEASE type or print legibly, you would be surprised how many unreadable forms we receive. Next sign and date the agreement on the appropriate lines. Upon receipt of the signed agreement, the actual software will be forwarded.

Notice in the agreement that the purchase price of UniFLEX software includes one year of maintenance.

If the program to be licensed is the UniFLEX Operating System itself, an additional sheet will be attached which lists the hardware setup required for UniFLEX. It is included so that you may double check your system and be sure you are compatible before continuing with the license.

When the Binary Software License Agreement has been filled out, return it promptly to your dealer or to Technical Systems Consultants, Inc. If there are any questions, contact Technical Systems Consultants, Inc. at (919)493-1451 or Telex 510-920-0540.

Thank you.
