

Add 3" Drive jumper on 09FLP Ver: 02 / Ver:09

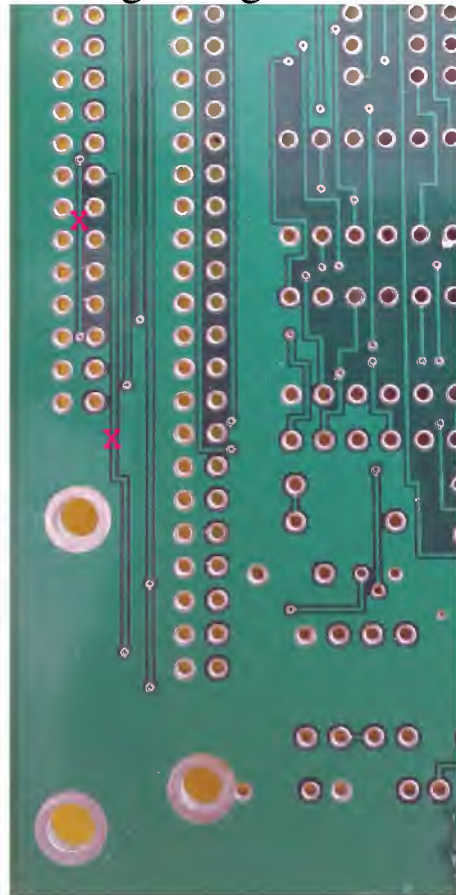

First cut the following two traces.

For Small 09FLP!

If existing straight connectors!

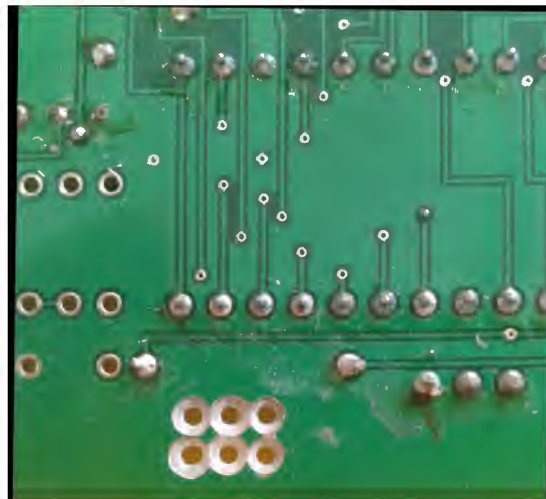

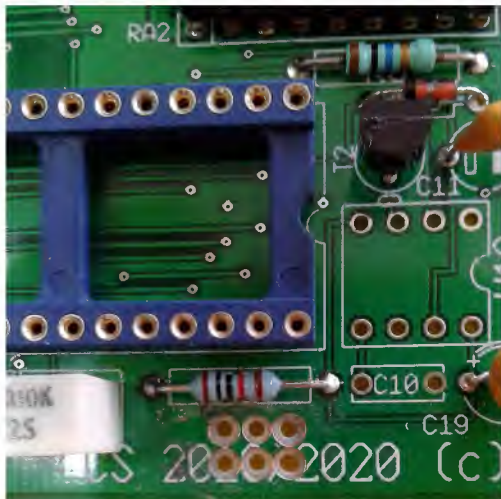

Component side!

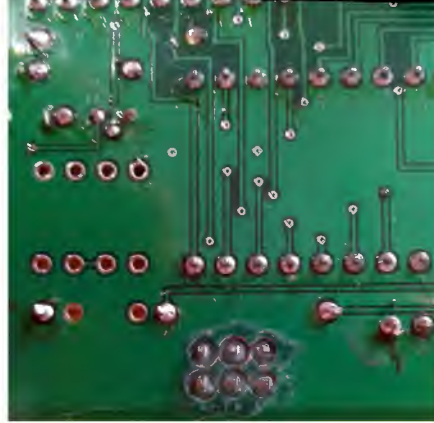

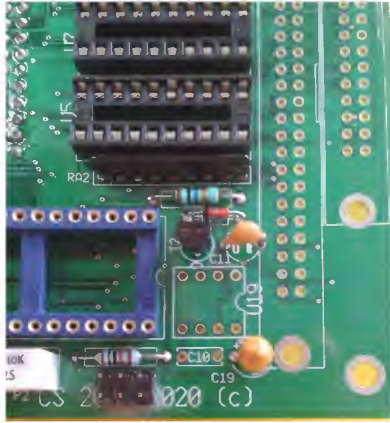

Solder side!

Then drill the 1.2mm holes for a 2x3 Pin Header.

The jumpers come below R5 for the use of Nextron P50 connector.
Remove the ground layer with a 3mm drill on both sides.

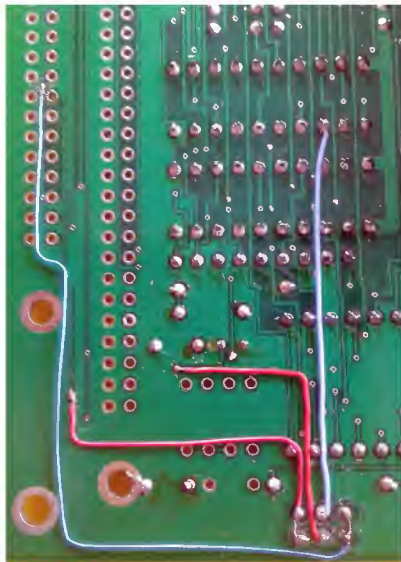

Glue the 2x3 Pin Header on the print component side.

Clean the pins on the solder side.

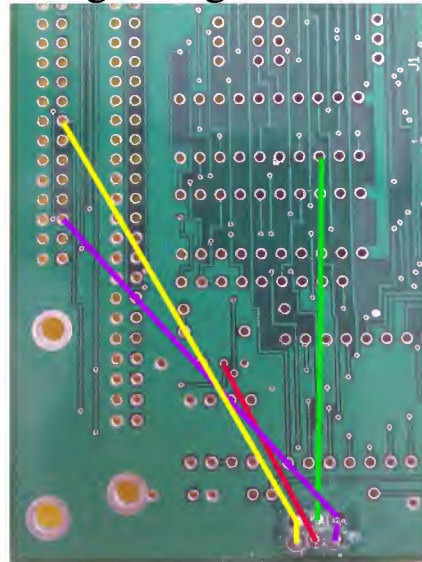

Now connect the following wires:

For Small 09FLP!

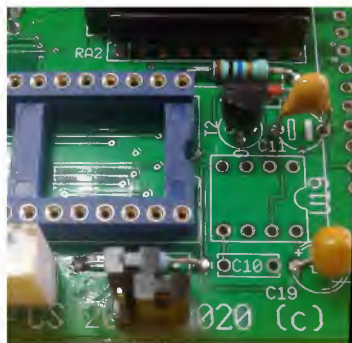

Use the via's and pin-3 U7.

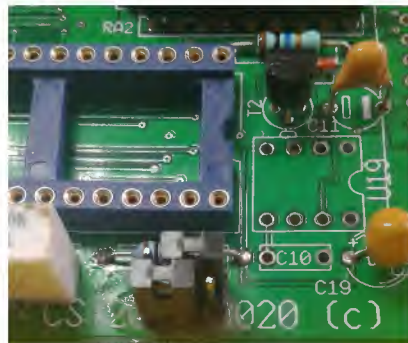

Existing straight connectors!

Use connector pin 3 and 20.

5" drive setting.

3" drive setting.
